

## Simplify Recordkeeping

AircraftLogs, the improved solution to paper-based records, provides a complete system for managing flight records, maintenance, and accounting. It's simple to use, FAA-compliant, and saves time. Each log entry or document can be securely stored and organized. You have convenient, worldwide access. All maintenance documentation can be organized, archived, and protected from loss – also protecting resale value. Share important information with maintenance providers, staff, or business partners easily and securely.

## Utilize Financial Reporting

Track every expense related to operating your aircraft. With simple passenger manifests and convenient logbook entries, AircraftLogs performs all the income tax calculations required for your aircraft. Finally, here is a

- Aircraft status at your fingertips
- Easy maintenance monitoring
- Expense tracking
- Latest IRS requirements
- E-mail alerts
- More than 100 standard reports
- Spreadsheet downloads
- Data security

system that lets you know your true operating costs and understands the key cost drivers behind them.

## Manage Maintenance and Pilot Currency

Managing your aircraft has never been easier. The Pilot Control Panel allows you to monitor upcoming maintenance events, pilot currency, and open squawks at a single glance. E-mail reminders ensure that you don't miss a single detail. Our customizable Trip Sheet and status reports let you manage compliance for one aircraft or an entire fleet. With one click, you can "drill down" to the maintenance status of any aircraft. From simple annual inspections to complex inspection programs, AircraftLogs enables you to track them all. Contact us at 888.359.5647 or visit [www.aircraftlogs.com](http://www.aircraftlogs.com) for more information.
